# DuraTac

*Converts Emulsion into Less Tracking Tack in Minutes*

DuraTac is an asphalt emulsion additive that significantly reduces tracking, accelerates drying, and enhances bond strength. DuraTac can be added to cationic and anionic emulsions. It instantly turns an emulsion into a less-tracking tack coat and eliminates the need for hard pen emulsions and associated problems of nozzle clogging, storage stability, and excessive heating.

## DuraTac Benefits

- No Change to Emulsion Properties
- Works with Anionic and Cationic Emulsions
- No Extra Tanks, Cleaning, or Chemicals
- Lower Distributor Temps vs HP Emulsion
- Enhanced Drying
- Non-Hazardous
- High Bond Strength
